

WaterMeter Self Installation Guide

Table of contents

1. What's in the box
2. Wiring Properties
3. Ready Mix Truck Schematics
4. Example of a WaterMeter Installed

What's in the box ?

WaterMeter Unit

Communication Cable

*If applicable. Depending on your inventory situation, we might send more or less wiring to make sure you have everything.

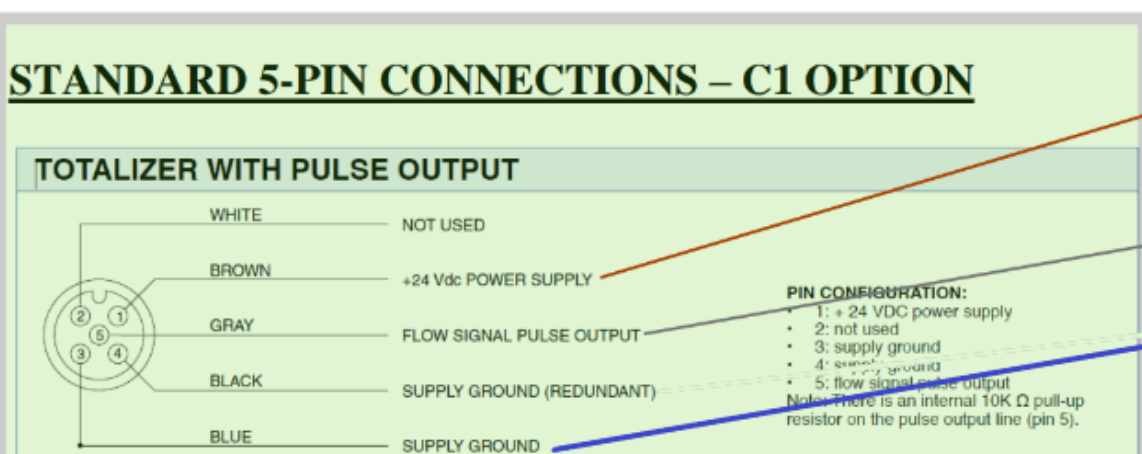

Wiring Properties

V-QJ1.0 (PEB2020)

Communication Cable

Communication Cable is the orange wire.

One end is to plug in the WaterMeter, the other has 3 wires. It should be **BROWN**, **GRAY**, and **BLUE**.

Power (12 - 24 V)
Connects to vehicle 12V

Pulse- connects to GPS
modem to blue wire

Ground

In the case you might receive 5 wires, you only need 3 as mentioned above :

- **BROWN** : Goes into your vehicle's 12V-24V power.
- **GRAY** : This is your Pulse that connects into the GPS modem's **BLUE** wire. It goes into Pin #3 (see picture below)
- **BLUE**: For your Ground.

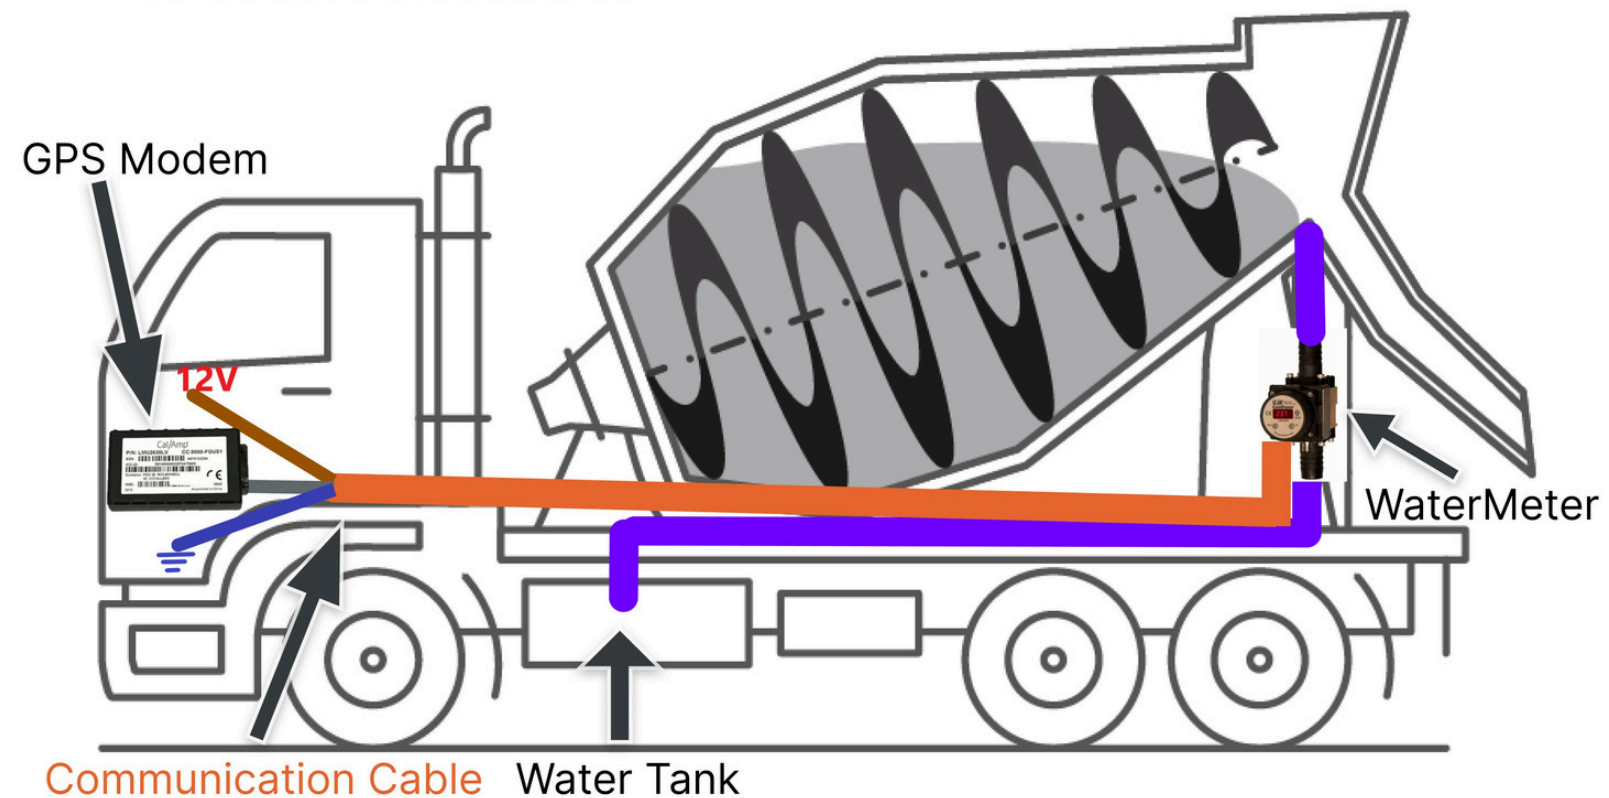

Ready Mix Truck Schematics

Here's a picture that displays pin numbers and their location for LMU263X

Here's a schematic of what setup should look like :

OPERATION OF A TRUCK MIXER

Example

Here's what
an Installed
WaterMeter
Unit should
look like :
