3. Real-Life Example
4. What you need

# What's in the box ?

## Hydraulic Pressure Switch (Or Sensor)

---

## There's also :

- Informational Booklet
- Cable that is already attached to the sensor
- If applicable : An extra 6 inches wire, depending on your inventory

## Wiring Explained

V-QJ1.0 (FEB2021)

# GPS Unit Modem Wiring

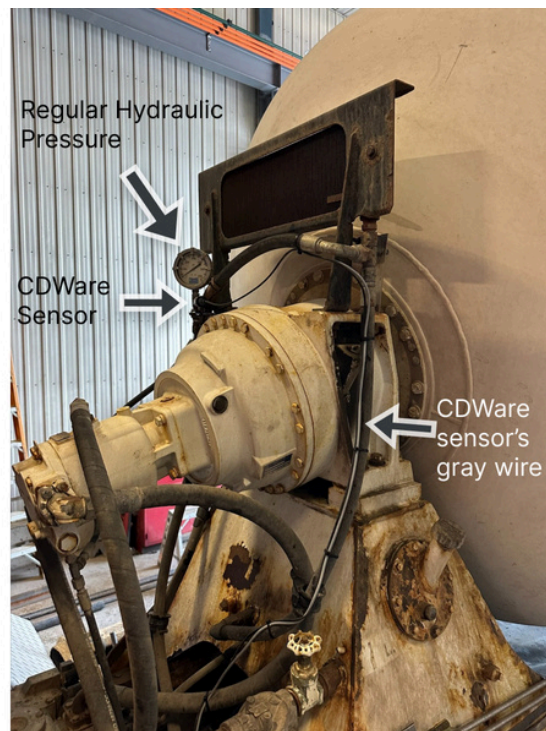

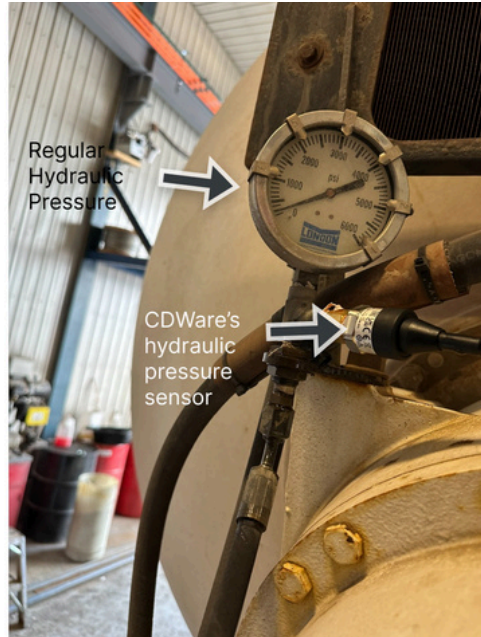

To connect the Hydraulic Pressure Sensor to the GPS Unit, you have two options :

- Either connect the sensor's **BLACK** wire to existing **PINK** wire into Pin #5
- OR take the **GRAY** wire and insert it into Pin #5

# Real-Life Examples

Here's what it should look like :

## What you Need

You will need this fitting as well to install the sensor. It is called a Quarter NPT. You will need 2 female and 1 Male connections, as illustrated.
